

Take the party everywhere
Marshall unveils new portable powerhouses; Emberton III and Willen III

August 19, 2024 – Today Marshall reveals exciting updates to their most loved portable speakers, offering powerful 360° sound to take on the road. Emberton III delivers 32+ hours of battery life in a dust and waterproof format to outlast any party. Meanwhile, the tiny but mighty Willen II is the perfect companion to bring on an adventure, with its rugged design and 17+ hours of portable playtime.

“It’s been a pleasure to see this generational update come to life. As always, with our iconic design and Marshall sound in focus, we’ve created something unique in the portable speaker category. On the outside of the speaker, the focus has been on improved material choices and usability, but the biggest update is on the inside. Both these products come ready for the next Bluetooth technology LE Audio, enabling Auracast™*. They also continue to deliver surprisingly heavy sound for the size, especially Willen II”, says Hanna Wallner, Product Manager

The slightly larger Emberton III features True Stereophonic, a unique form of multi-directional sound from Marshall. True Stereophonic is stereo sound, but not as you’ve heard it before. Available exclusively with Marshall products, you can now experience superior spatial and binaural sound that flows around you, filling any space.

Although smaller in size Willen II makes a huge impact. It has a slightly larger frame than its predecessor, to maximise bass and the overall acoustic performance. Improved drivers mean that every frequency gets its time to shine so you'll hear a balanced sound at any volume you choose.

Both Emberton III and Willen II come with a IP67 dust and waterproof rating, meaning you can submerge it in 1 m (3 ft) of water for a period of up to 30 minutes. The speakers are also Bluetooth LE Audio-ready. This future-proof technology will open a new world of audio sharing possibilities with Auracast™.

As part of their portable campaign, and to celebrate this new range, Marshall has partnered with three musical pioneers who embody the rock 'n' roll mindset. Suki, Kelvin Krash, and Bohan Phoenix each bring a unique perspective to music, continuing to create on their own terms. Together with Marshall, they share a day in their life and their distinctive journeys into the music industry. Discover their stories at [Marshall.com](https://marshall.com).

Available to pre-order today and for sale globally from August 26 on [Marshall.com](https://marshall.com), Emberton III (159 GBP) and Willen II (99 GBP) let you tune in and turn it up, by prioritising rock 'n' roll performance over complicated features.

*Auracast™ is the latest Bluetooth technology that soon will be available as an over-the-air update in the Marshall Bluetooth app. One of the benefits that Auracast™ gives you is a "share audio" feature. With this new feature, you're no longer dependent on a source device with Auracast™. Instead, Emberton III and Willen II will act as source devices, allowing you to broadcast music to multiple Emberton III and Willen II units simultaneously. You simply have to connect your phone to one speaker via Bluetooth, and it will sync audio to the others.

EMBERTON III KEY FEATURES INCLUDE
